

Health Sector Updates

As of June 11, 2020

 - Updated information

Please see below for the latest enhancements to the Survey Portal:

★ After logging in, you have access to an **updated recording of the CSE Survey - Health Training Webinar**. It is located on the Help Page. This recording summarizes all the features of the survey portal and provides you with step-by-step instructions on how to use it.

★ The list of **Organization Types** has been **updated**. All impacted entities will be changed on the back-end, no additional effort required for impacted respondents.

If this is relevant to you, you may notice a different organization type for your entity upon logging in. (Please note, it may take a bit of time for your entity to be remapped accordingly.) Please see Appendix B for a full list of Organization Types.

★ Within the Inventory Input Page, you can manually save your data using the **'Save as Draft'** button. **Please don't forget to click 'Submit' once you have completed your submission.**

★ The **list of inventory items** has been updated - all reusable products have been removed and the list of disposable products has been updated. Please ensure you add all new items applicable to your entity. (Note: If you have reusable versions of any of the items listed, you do not need to report on them.)

For a demo of the Survey Portal, please view the training schedule on the Help & FAQ Page.

Changes to Inventory Items

All inventory items included in the survey **are disposable items only**. Disposable is defined as inventory items that can only be used once. If your organization carries **reusable items**, you **do not** need to report data on them.

The following inventory items have been CHANGED:		
Previous Inventory List	Updated Inventory List	Explanation
Body Bags		<ul style="list-style-type: none"> Item removed, no longer need to report on it

Reporting Cadence

Following up on the Ministry's commitment to reduce data reporting burdens and in support of the first stage of the government's reopening framework, the Minister of Health has issued an [updated Order](#) that allows for reduced frequency in reporting:

- **Please report twice per week, on Mondays and Thursdays via the CSE Survey tool, between 8am and 5pm EST.** If, for any reason, you are unable to submit on a Monday or Thursday, please submit on an alternate day (ensuring you make at least two submissions per week)
- Only change is to frequency, not how you report. Please continue to report on what you used in the 'last 24 hours' and what you will use in the 'next 24 hours' - you will now report on your 'daily' inventory needs, two days per week
